-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-30 have been examined and are rejected.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Law et al. (US PGPub 2001/0056501.)

4. As per claims 1, 11, and 21, Law teaches a method comprising:

establishing a wireless connection between a cableless provider and a consumer; and (paragraph 0031)

using pre-exchanged information in order to avoid the need to exchange information each time a connection is established (paragraph 0032.)

5. As per claims 2, 12, and 22, Law teaches the system further including exchanging information upon the first connection between a given cableless provider

and a consumer (paragraph 0031-0032, wherein a synch and data packet is initially transmitted.)

6. As per claims 3 and 13, Law teaches the system further including storing information in order to avoid the need to exchange information each time a connection is established (paragraph 0031-0032, wherein a lookup table is formed.)

7. As per claims 4 and 14, Law teaches the system further including denominating said consumer as the master device and said cableless provider as slave device (figures 7A and 7B, wherein the consumer is always receiving and the provider is always sending.)

8. As per claims 5, 15, and 30, Law teaches the system further including programming said consumer to always be the master device (figures 7A and 7B, wherein the consumer is always receiving.)

9. As per claims 6, 16, and 24, Law teaches the system further including enabling a Bluetooth connection (paragraph 0030, wherein Bluetooth is a 2.4ghz frequency connection as per the "Background of the Invention" section.)

10. As per claims 7, 17, and 25, Law teaches the system further including enabling a Bluetooth connection between said consumer and said cableless provider without

Art Unit: 2141

providing for authentication (paragraph 0031-0032, wherein no authentication takes place.)

11. As per claims 8, 18, and 26, Law teaches the system further including enabling a connection between the cableless provider and the consumer without providing for pairing (paragraph 0031-0032, wherein no pairing takes place.)

12. As per claims 9, 19, and 27, Law teaches the system further including providing an indication bit that identifies the cableless provider to establish a connection (paragraph 0031-0032.)

13. As per claims 10, 20, and 29, Law teaches the system further including providing information to a consumer from a cableless provider that indicates the type of device of the cableless provider (paragraph 0031-0032, wherein FHS packets with device type are inherent in the use of the Bluetooth protocol.)

14. As per claim 23, Law teaches the system further wherein said device is a consumer (figure 7B.)

15. As per claim 28, Law teaches the system further wherein said device identifies itself through an FHS packet (paragraph 0031-0032, wherein the use of FHS control packets are inherently required in the use of the Bluetooth protocol.)

Conclusion

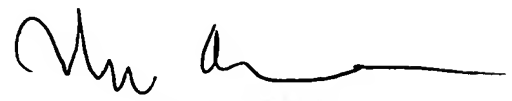

16. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This includes US PGPubs: 2002/0184299, 2002/0061031, and 2002/0174364.
